

24(C) SPECIAL LOCAL NEED LABELING

AMINE 400 2,4-D WEED KILLER

FOR DISTRIBUTION AND SALE IN MONTANA ONLY

PURPLE LOOSESTRIPE SUPPRESSION IN MONTANA:

For use along the edges of ponds, lakes, reservoirs, wetlands, drainage ditches, rivers and streams.

To be applied by personnel of local, state, or federal government agencies or by licensed commercial applicators under contract to these government agencies.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

APPLICATION SCHEDULE:

Amine 400 can be applied as a broadcast foliar spray for the suppression of purple loosestrife. Treat when the plants are actively growing or until the mature seed stage of the purple loosestrife. Best results are achieved when the application is made during the summer or fall months; however, fall treatments must be applied before a killing frost.

APPLICATION EQUIPMENT AND SPRAY VOLUMES:

Use hand-held spray guns, vehicle mounted booms, backpack sprayers, or other high volume equipment to deliver coarse sprays under low pressures. Spray volumes of 100-200 gallons per acre are recommended. The applications should be made on a spray-to-wet basis or applications should provide uniform and complete spray coverage. As the weed density increases the spray volume should be increased within the recommended range of 100-200 gpa to ensure complete coverage. Do not apply when wind speeds are at or above 10 mph. To aid in avoiding spray drift, use coarse sprays and low pressure. Do not use nozzles which produce fine spray droplets under high pressure. Do not contaminate domestic or irrigation waters.

DOSAGE RATE RECOMMENDATIONS:

Prepare a 0.75 - 1.0 percent solution (vol./vol.) of Amine 400 in water. Sequential applications at the same concentration with a 3 to 4 week interval may be needed for adequate control.

| Volume of Spray Solution | Amount of Amine 400 | |
|--------------------------|---------------------|------------|
| | 0.75% | 1.00% |
| 1 gallon | 1.00 fl.oz. | 1.3 fl.oz. |
| 25 gallons | 0.75 quart | 1.0 quart |
| 100 gallons | 3.00 quarts | 4.0 quarts |

IMPORTANT: BEFORE USING AMINE 400 READ AND CAREFULLY OBSERVE THE PRECAUTIONARY STATEMENTS AND ALL OTHER INFORMATION ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of Amine 400 which may not appear on package labels. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
